Technical Skills

- Programming: (C, Python)
- Core Concepts: (DSA, OOPS, DBMS)
- Tools/Platforms: (Git, Canva, VS Code)

Projects

- Personal Portfolio Website | Flask, SQLite, HTML, CSS, JavaScript

Developed and deployed a full-stack personal portfolio website to showcase projects, skills, and achievements. Built a responsive frontend using HTML, CSS, and JavaScript, with a Flask backend for handling contact form submissions. Integrated SQLite database for storing visitor messages and Gmail SMTP for real-time email notifications. Successfully deployed the application on Render using Gunicorn for production hosting.

- AI-Powered Real-Time Fault Detection Platform

Developed an AI-driven system to detect electrical faults in circuits through real-time parameter analysis. Identified conditions such as short circuits, open circuits, voltage irregularities, and abnormal current fluctuations using data-driven anomaly detection techniques. Improved fault diagnosis speed and enhanced circuit reliability through automated monitoring.

Internships

- Social Internship

Interacted with local people and users and explained about the digital literacy and its need in the near future and have documented a report with the guidance from our university

Achievements

- Cambridge Assessment English Linguaskill(B2/164)
